

Functional Surgery Patients Pre-Payment Policy:

You will receive a call from our office at least 2 weeks prior to your surgery date (if you have not met your deductible) to collect a pre-payment towards the physician's services.

Prior to calling you, we will check with your insurance company to see what your remaining deductible amount is.

We will use the below deductible/pre-pay information to determine what we need to collect.

For patients with remaining deductibles:

\$ 500 (but less than \$1,000) to pre-pay \$ 300

\$1,000 (but less than \$1,500) to pre-pay \$ 500

\$1,500 (but less than \$2,000) to pre-pay \$ 700

\$2,000 (but less than \$2,500) to pre-pay \$ 900

\$2,500 (but less than \$3,000) to pre-pay \$1,000

Any remaining deductible or co-insurance balance due will be billed to you after your insurance company processes your claim.

You may also have a balance due from our surgery center as we do not collect a pre-pay for that. We will send this to insurance first. If any balance is due, we will bill you after insurance processes your claim.

We accept cash, check and credit cards including CareCredit.

FYI: You can use your FSA/HRA/HSA credit card to pre-pay surgery. We will provide you with an itemized receipt if required.
